

# David Schneider

Full-Stack Software Engineer | [dschneider.dev](https://dschneider.dev) | [Github](#) | [LinkedIn](#)

## PROJECTS

### [Jeopardy](#) — Backend Project (DigitalCrafts)

Utilizes a Jeopardy Game Archive API to allow users to play every Jeopardy from 1995 to the present. Employs JavaScript, DOM Manipulation, Express, PostgreSQL, and AWS Deployment. Allows user signup/login, password encryption, game logging and statistics.

### [myDoppel Facematcher](#) — Frontend Project (DigitalCrafts)

Entertainment application that allows user to upload a photo, select from a given list of TV shows and see which character they most closely resemble. Utilizes JavaScript, API calls, NodeJS and HTML & CSS.

## WORK & RESEARCH EXPERIENCE

### University of South Florida, Tampa, FL - Psychology Researcher

AUGUST 2016 - AUGUST 2018

- Created and maintained data sheets throughout testing period
- Analyzed data after collection period, utilizing statistical software
